Emmy Lim

Enthusiastic Web Developer with 10+ years of experience creating delightful user experiences. Proven track record designing and developing core products for startups, managing full-stack projects, and leading successful teams. Adaptable and resourceful, adept at tackling challenges and innovating solutions.

SKILLS

React, Javascript, HTML/CSS, Python, React Native, Java, Kotlin, ObjC, Swift, Groovy/Grails, PostgreSQL, Cassandra, MongoDB, Git, Perforce

EXPERIENCE

Discord, San Francisco — *Senior Software Engineer*

JAN 2018 - JAN 2024

- Key Contributor: Played a pivotal role in developing and maintaining Nitro, Discord's core revenue-generating SaaS product, responsible for a significant portion of the company's revenue.
- Technical Leadership & Collaboration: Demonstrated leadership by acting as a tech lead for multi-engineer feature teams (2-3 engineers) and actively contributed across the organization by reviewing PRs and RFCs.
- React Native Expertise: Led the mobile development efforts, acting as a subject matter expert in React Native and mentoring other engineers on its adoption.
- Full-Stack Ownership: Contributed at various levels for all Nitro features, from independently implementing entire features to collaborating on complex projects, while ensuring code quality through code reviews and multiple on-point rotations. I also participated in experimenting and rolling out new versions and features to users, ensuring smooth releases.
- Talent Acquisition & Onboarding: Proactively participated in the recruitment process by interviewing and onboarding new hires, contributing to the company's rapid scaling.

Clearslide, San Francisco — *Full Stack Developer*

JUNE 2017 - DEC 2017

- Led the development and design of new content search, management, and browsing experiences, ensuring a rich, responsive, and scalable user experience.
- Championed a well-componentized, easily maintainable, and brand-consistent front-end codebase, streamlining future development and fostering code quality.

Deem, San Francisco — *Senior Software Developer*

JULY 2013 - JUNE 2017

- Led the development of modern user experiences for Deem's core travel product, contributing to multiple projects across the Grails Travel platform and mobile framework including translating the front-end to use React.

- Spearheaded the development of the Grails Travel API layer, designing and implementing data-modeling services and controller functionality.
- Championed accessibility, scalability, and graceful degradation in front-end design and development, ensuring a seamless user experience for all while meeting tight deadlines.

EDUCATION

Macalester College, Saint Paul — *BA in Computer Science, Japanese Language and Culture*

2009 - 2013

GPA 3.98 Summa Cum Laude

Waseda University, Tokyo — *Bachelor of Arts (BA) in International Liberal Studies*

2012
