Emmy Lim

Full-stack Engineer with a focus on UI development and UX design across Mobile and Web

I'm adventurous enough to get down and dirty and learn something new, adaptable enough to fit in with paradigms or frameworks, and opinionated enough to prescribe my own.

I love knowledge sharing with other developers and getting them up to speed.

Let's exchange ideas and build something that feels special and delightful.

Discord (https://discordapp.com/)

Full Stack Developer | 01/2018 to 01/2024

6 Years contributing to all features across Discord' main revenue generating subscription services, including the Game Store, Activity Feed, Nitro, Nitro Classic, Stickers, Server Boosting and the Collectibles Shop across web, iOS and Android.

Nitro Highlights include: Subscription/upgrade/churn flow, Nitro upsell framework, Light theme, Profile Themes, Avatars, Avatar Decorations, Soundboard, Boosting, Video Backgrounds, Banners, Badging and Client Themes.

These features were the main drivers of Discord's revenue. Avatar Decorations alone, which was released in 2023 made about $8 million in Revenue.

Tech lead on multiple revenue features across all platforms.

React Native mobile expert in the Revenue organization responsible for onboarding and training newer engineers.

Both iOS and Revenue on-call rotations requiring triaging bugs and rolling out the latest Discord iOS version.

Member of the Mobile Charter, a small group of Engineers responsible with documenting best practices, training other engineers and general mobile app code improvements or upgrades.

Skills utilized:

`HTML/CSS-modules` `Javascript/React/Flux/Flow/Typescript` `React Native` `Git` `Python` `Postgres` `Kotlin` `Swift` `Java` `ObjC`

Clearslide (https://www.clearslide.com/product/sales-content/)

Full Stack Developer | 06/2017 to 011/2017

Full Stack engineer and Front End expert mainly responsible for development of new Content search, manage and browse experiences that are rich, responsive, scalable.

Point person for design systems and cross-browser solutions.

Responsible for developing and trailblazing a well componentized, easily-maintainable and brand consistent front end code base.

Skills utilized:

`HTML/Sass` `Javascript/React/Redux` `Underscore` `Java` `Backbone` `Git` `JQuery` `Angular`

Deem (https://www.deem.com/products/travel)

Senior Software Engineer — 07/2013 to 06/2017

Primary Front End engineer in multiple projects responsible for building newer and more modern experiences for Deem's core travel product on the Grails Travel platform and the Deem mobile framework.

Primary Engineer for the Grails Travel data-modeling Services and Controller API layer.

Responsible for designing and developing an accessible, scalable, gracefully degrading and future-friendly front-end user experience, while delivering on an often short development timeline.

Skills utilized:

`HTML/Stylus` `Javascript/YUI` `Groovy/Grails` `Handlebars` `Backbone` `Perforce` `Java` `JQuery`

Associated Colleges of the Midwest (http://macademia.macalester.edu/Macademia/)

Research Assistant — 06/2010 to 12/2011

Primary Front End engineer that designed and created interactive data visualizations, utilizing the Javascript Infovis Toolkit, RaphaelJS and Jquery UI, as well as associated services and controllers.

Engineer in a team of 8 that created an experimental analytics platform to test the effects of data-representation methods and recommendation algorithms on cyber-balkanization.

Skills utilized:

`HTML` `Javascript/JQuery` `Groovy/Grails` `Java` `mongoDB` `Python`
